

How to upload project on Github ?

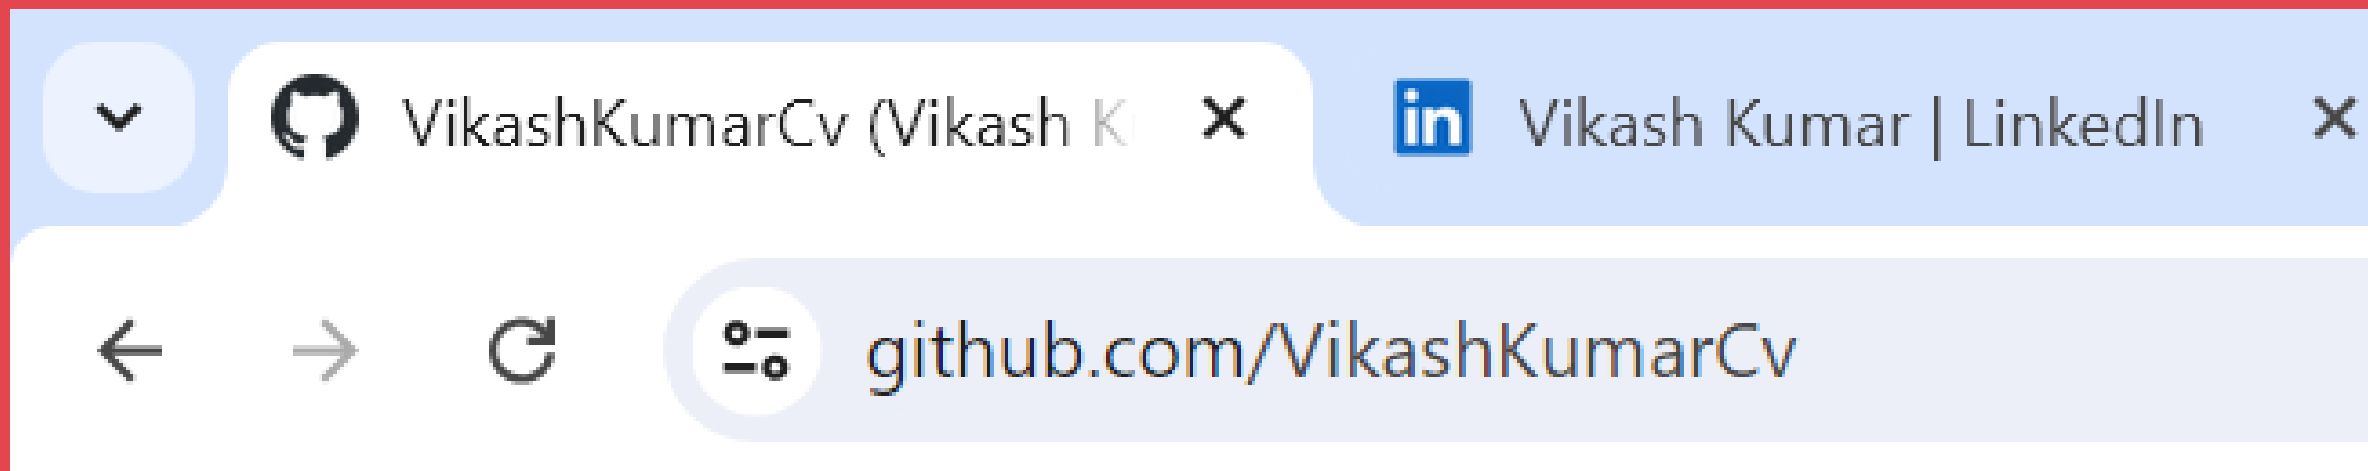

SIMPLE

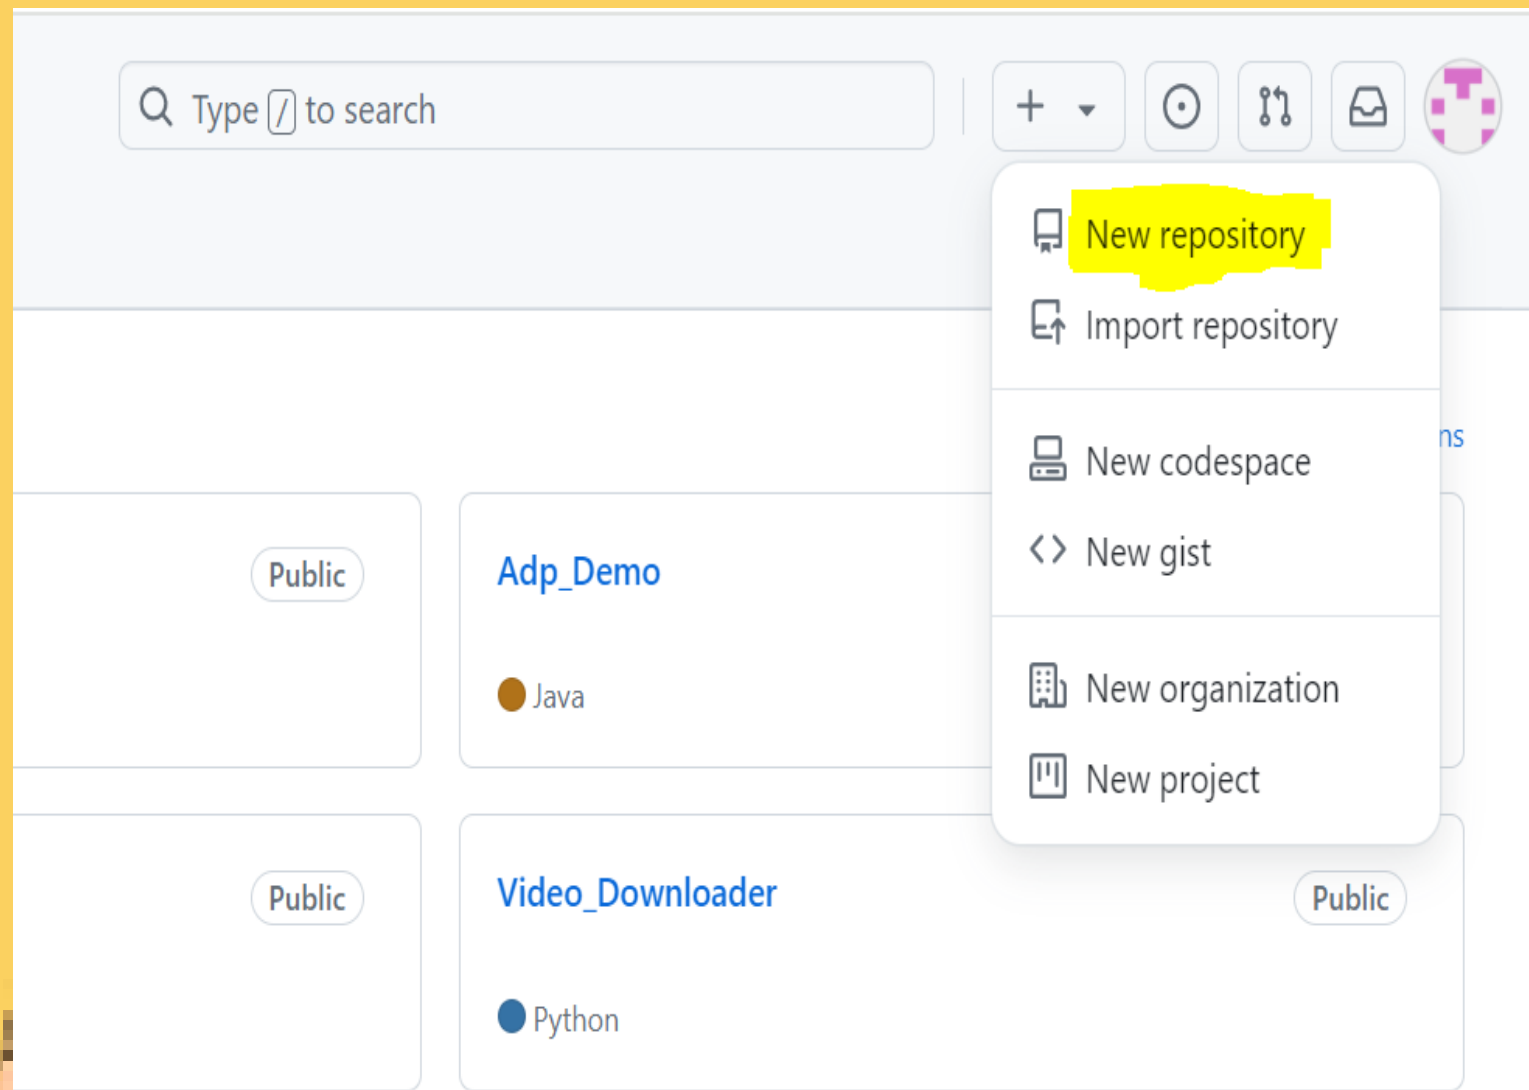

STEPS

Open ur Github account

Click on new repository

give a name to it

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Required fields are marked with an asterisk ().*

Owner *

 VikashKumarCv ▾

Repository name *

/ My-Project

✓ My-Project is available.

Great repository names are short and memorable. Need inspiration? How about **effective-giggle** ?

Description (optional)

mark it as public or private

-
- ☒  **Public**
Anyone on the internet can see this repository. You choose who can commit.
 - ☐  **Private**

-

Initialize this repository with:

click on create repository

Create repository

open cmd

```
Command Prompt
Microsoft Windows [Version 10.0.22000.856]
(c) Microsoft Corporation. All rights reserved.

C:\Users\Pranav>cd New folder
```

cd <location>

```
Command Prompt
C:\Users\Pranav>cd Desktop
C:\Users\Pranav\Desktop>cd New folder
```

type 'git init' and hit enter

```
C:\Users\Pranav\Desktop\New folder>git init  
Initialized empty Git repository in C:/Users/P
```

type 'git add .'

and hit enter

```
nav\Desktop\New folder>git add .
```

type 'git commit -m"anything"' and hit
enter
and hit enter

```
older>git commit -m"first commit"  
[ first commit  
+)  
E
```

go to the created repo and copy the url

do this kind of thing before

SSH

```
https://github.com/VikashKumarCv/My-Project.git
```

ing file. We recommend every repository include a [README](#),

type 'git remote add origin <paste url>
and hit enter

```
>git remote add origin https://gi
```

type the below command
and hit enter

```
>git push origin master
```
